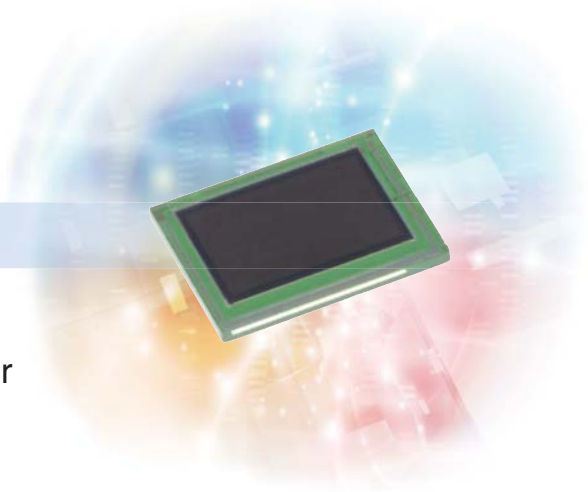
SONY

IMX323LQN



Diagonal 6.23 mm (Type 1/2.9)
Approx. 2.19M-Effective Pixel Color CMOS Image Sensor

Full HD Support High Sensitivity CMOS Image Sensor with a Super Small Package for Industrial Applications

Sony has commercialized the "IMX323LQN" CMOS Image Sensor that realizes a compact and thin package while maintaining low illumination performance equal to that of the existing Sony product (IMX222LQJ*) that improved sensitivity in the near infrared region for industrial applications.
WLCSP (Wafer Level Chip Size Package) technology is used to realize a smaller size while maintaining performance such as visibility. The package size has been reduced to 1/8 the volume of the previous product, which helps to greatly reduce the set size.

- Frame rate 30 frame/s
- On-chip 10-bit/12-bit ADC
- Pixel size: 2.8 µm-square unit pixel
- Compact and thin package using WLCSP technology
  7.55mm (H) × 5.75mm (V) × 0.77mm (t)
- Improved sensitivity in the near infrared range

Exmor

* Exmor is a trademark of Sony Corporation. The Exmor is a version of Sony's high performance CMOS image sensor with high-speed processing, low noise and low power dissipation by using column-parallel A/D conversion.

Compact and thin package

The IMX323LQN is the first Sony CMOS image sensor for industrial applications to use WLCSP (Wafer Level Chip Size Package) technology, which realized a reduced package size and thickness (7.55mm (H) × 5.75mm (V) × 0.77mm(t)) compared to the existing product IMX222LQJ (12.8mm (H) × 10.8mm (V) × 1.95mm (t)). This makes it possible to shrink the set board size, which helps to reduce the camera size (Photograph 1).

Improved sensitivity in the near infrared range

Improved picture quality at low illumination is strongly demanded of cameras for industrial applications. To meet this demand, Sony also applied technology to the IMX323LQN that increases sensitivity in the near infrared range as well as the visible light range. This makes it possible to obtain clear images that enable to sufficiently discriminate subjects even under moonlit conditions. (Photograph 2).
